## 4. FIRST AID MEASURES

---

### General advice

Eye contact	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Inhalation	If breathed in, move person into fresh air. If unconscious place in recovery position and seek medical attention. If symptoms persist, get medical attention.
Ingestion	Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin Contact	Wash contaminated skin with plenty of soap and water. Remove contaminated clothing and shoes. Get medical attention if irritation occurs.

### Most important symptoms and effects, both acute and delayed

#### Potential acute health effects

Eye contact	Causes eye irritation.
Inhalation	May be harmful if inhaled.
Ingestion	Irritation in mouth, throat and stomach.
Skin contact	May cause skin irritation.

### Indication of any immediate medical attention and special treatment needed

Notes to physician	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	No specific treatment.
