"Tim Gore's Bloodline and Lifeline paints by Createx are the perfect colors for the FX artist. These are my go-to colors for painting creatures, as well as to mimic human life-like skin. The best part is that these Createx colors match the make-up colors I regularly work with in my make-up FX kit for set work. I enjoy these paints so much for my projects at Kosart Studios, that I decided to switch to Tim Gore's Bloodline and Lifeline paints when teaching my students how to paint their masks, props, and display sculptures at Kosart School for Entertainment Arts. They are a masterful line of paints."
